## About Us

Established in the year 1989, at Howrah, West Bengal (India), we, “Kalyaneshwar Timber Co.”, are one of the leading suppliers of superior quality Block Boards, Woods, Plywood, Wooden Doors, Window Frames, Pine Board, Moulded Panel Skin Doors, Red Ply and a lot of other products. These are manufactured using premium quality wood materials and are widely acknowledged for their features like termite resistance, perfect look and excellent finish. Our professionals are highly creative in manufacturing block boards and ply wood products. Their expertise in the respective areas has enabled us to fabricate furniture that is highly innovative in terms of design and style.

We are facilitated by a huge infrastructure facility that sprawls across a wide area. Furnished with technologically advanced equipment and machinery, our infrastructure base is divided into a number of units. Furthermore, we have a spacious warehousing unit that is spread across a very large area. In order to protect our range of products, the entire area is chemically treated to protect it from any termite attack. Our range is seasoned to keep the required moisture level and we take extra care for delicate items, in which case the products are fumigated also.

Our organization is progressing continuously because of the hard work and dedication of our team members. Further, the unique array of products and services offered by us have enabled us to carve a niche with our customers and garner a huge client base across the world.
